Operating Temperature

Target.

Modes of measurement:

Unit of measure: lb, in-lb, Nm

Resolution:

Display: 5-digit, alpha-numeric LCD with function and battery indicator icons.

Accuracy: Torque: Within ±2% of Indicated Value of both CW and CCW directions. (10%-100% of F.S)

Angle: Within ±1° when rotating to 90° at the speed rate @ 2°/s to 400°/s

Required minimum 5% of F.S pre-torque

Calibration: Recommended to be performed (by DTS) once a year or every 15,000 cycles which ever comes first.

Resolution:

Battery Power:

Using 3 AAA batteries up to 200 hours of operation.

Certification:

This device is calibrated at the factory and is certified to meet International Standards. ISO-6789-2003 and ASME B107-28-2005 standards compliant. Certificate of N.I.S.T. (National Institute of Standards Technology). Traceability from 10% to 100% of full scale.

Maintenance:

To clean the meter, wipe with a lightly dampened cloth. DO NOT use: solvents, thinners or engine cleaners. DO NOT immerse in any liquids. It is highly recommended that your Torque & Angle Meter be calibrated once a year or every 15,000 cycles; whichever comes first. Contact Digitool Solutions representatives for repair and calibration services.

Warranty Service and Recalibration:

Digitool Solutions provides a 1 year warranty that covers any Digital Torque & Angle Meter which fails to give satisfactory service due to defective workmanship or materials (excluding calibration) for 12 months from the date of original purchase. Calibration is only covered by this warranty for each new unused Torque & Angle Meter out of box. Products must be returned with proof of purchase—freight prepaid—to the warranty service center listed below.

This warranty excludes Torque & Angle Meters which have been subjected to abnormal use, accidental damage, neglect, or lack of maintenance. Any modification or disassembly of this Torque & Angle Meter, or repair by an unauthorized service center will void the warranty. This warranty gives you specific rights. You may also have other rights which vary from state to state. The foregoing obligation is Digitool Solutions sole liability under this or any implied warranty; and under no circumstances shall Digitool Solutions be liable for any incidental or consequential damages.

Note: Some states do not allow the exclusion or limitation of incidental or consequential damages so the above limitation or exclusion may not apply to you.

Ver. Dec 14
Important Safety Instructions

- **WARNING** - Risk of flying particles.
- Read this entire User’s Guide before using the Torque and Angle meter. Always follow good professional tool practices.
- Wear Safety goggles.
- Insure that all equipment is in good working order and that ratings of the Torque Meter, tools and drives exceed the torque being applied.
- Never use the Torque and Angle Meter with the power off.
- Never initiate ZeroTare with torque applied.
- Save these instructions.

Introduction

The DTS Torque and Angle Meter provides Torque accuracy within ±2% both directions CW and CCW of reading between 10% and 100% of full scale. Angle accuracy ±1° of 90° rotation @ speeds between 2°/s to 400°/s. It is rugged enough to accept the output torque of non-impacting: power tools, nut-runners or robotic spindles. It may be used as an adaptor between any square drive hand tool, such as a ratchet wrench or breaker bar, and common fastener drive sockets. Because the Torque and Angle Meter is entirely self-contained, there is no wrap up of interconnecting cables during use. The display is user selectable for ft-lb, in-lb or Nm units of measure. Three modes are featured:

- **TOURQUE** - Display torque value in real time when torque is loading and show peak torque when torque is released.
- **ANGLE** - Display torque and angle will clear values after 15 seconds.

Example: Applied Angle reach 90°, released force from handle the display will show Torque: 180.8 ft-lb for 0.5 second then display 90° for 0.5 second

Keypad Functions:

**Power ON - M key**

- **U** - Unit Select - ft-lb, in-lb or Nm
  - Zero Angle (hold the key 3 Sec.)
  - Zero Tare Torque (hold the key 3 Sec.)
- **M** - Mode Select - TORQUE, ANGLE
  - Manual power off, (hold the key 3 Sec.)
  - Increase TARGET TORQUE / ANGLE value (Push and Hold the key for rapid scrolling)
  - Decrease TARGET TORQUE / ANGLE value (Push and Hold the key for rapid scrolling)

Powers OFF is automatic after 5 minutes of idle time

Front Panel Display and Keypad

Operator Instructions

1. **Setup:**
   a. **Power ON** the Torque & Angle Meter by pushing the M key. **Power-OFF** Push and Hold the M key for more Than 3 sec to power down.
   b. Push the **U** key (Select Engineering Units) Repeatedly push the U key to display the desired Unit of measure, ft-lb, in-lb or Nm.
   c. In Torque Mode: 1– Clear Torque Display (Push the U key) 2– Zero Tare (Push and Hold the U key for 3 Sec.)
   d. In Angle Mode: 1– Clear Angle Display. (Push the U key) 2– Zero Angle (Push and Hold the U key for 3 Sec.) Make sure the device stays on flat surface and station -ary.
   e. Push the **M** key. (Select Torque or Angle Mode.) Repeatedly push the M key to select Torque or Angle Mode.
   f. Push the ▲ or ▼ key. (Increase or Decrease Torque and Angle desired value.)
   g. Torque Mode: Use these keys to increase or decrease to the desired Torque value.
   h. Angle Mode: Use these keys to increase or decrease to the desired Angle value.

During loading in TORQUE and ANGLE modes, the Torque and Angle Meter will display applied torque or Angle in real time. The yellow LEDs and the buzzer begin pulsing at 80% of TARGET TORQUE, in creasing as the TARGET TORQUE value is approached.

2. **Application:**
   a. With the power on, install the Torque and Angle Meter between the driver and the socket.
   b. Apply torque load to the fastener in either CW or CCW directions. During loading, the Torque and Angle Meter will display applied torque in real time.
   c. When the applied torque is within 4% of the TARGET TORQUE value in PEAK modes, the green LED, buzzer and vibrator (optional) will alert continuously. Stop applying torque, as the installation is complete.

Release Indications:

- Should the applied torque exceed the TARGET TORQUE value by more than 4%, the red LED and buzzer will alert continuously. If the Torque Meter range is exceeded by 125% the display will indicate “OVER TORQUE.”

Box Includes:

- Torque Angle Meter
- User’s Guide
- P/N TA-XXXF
- P/N DTS-UG-T+A
